

# Mechanics of the GUI: Output Window

Choose different results from this dropdown box

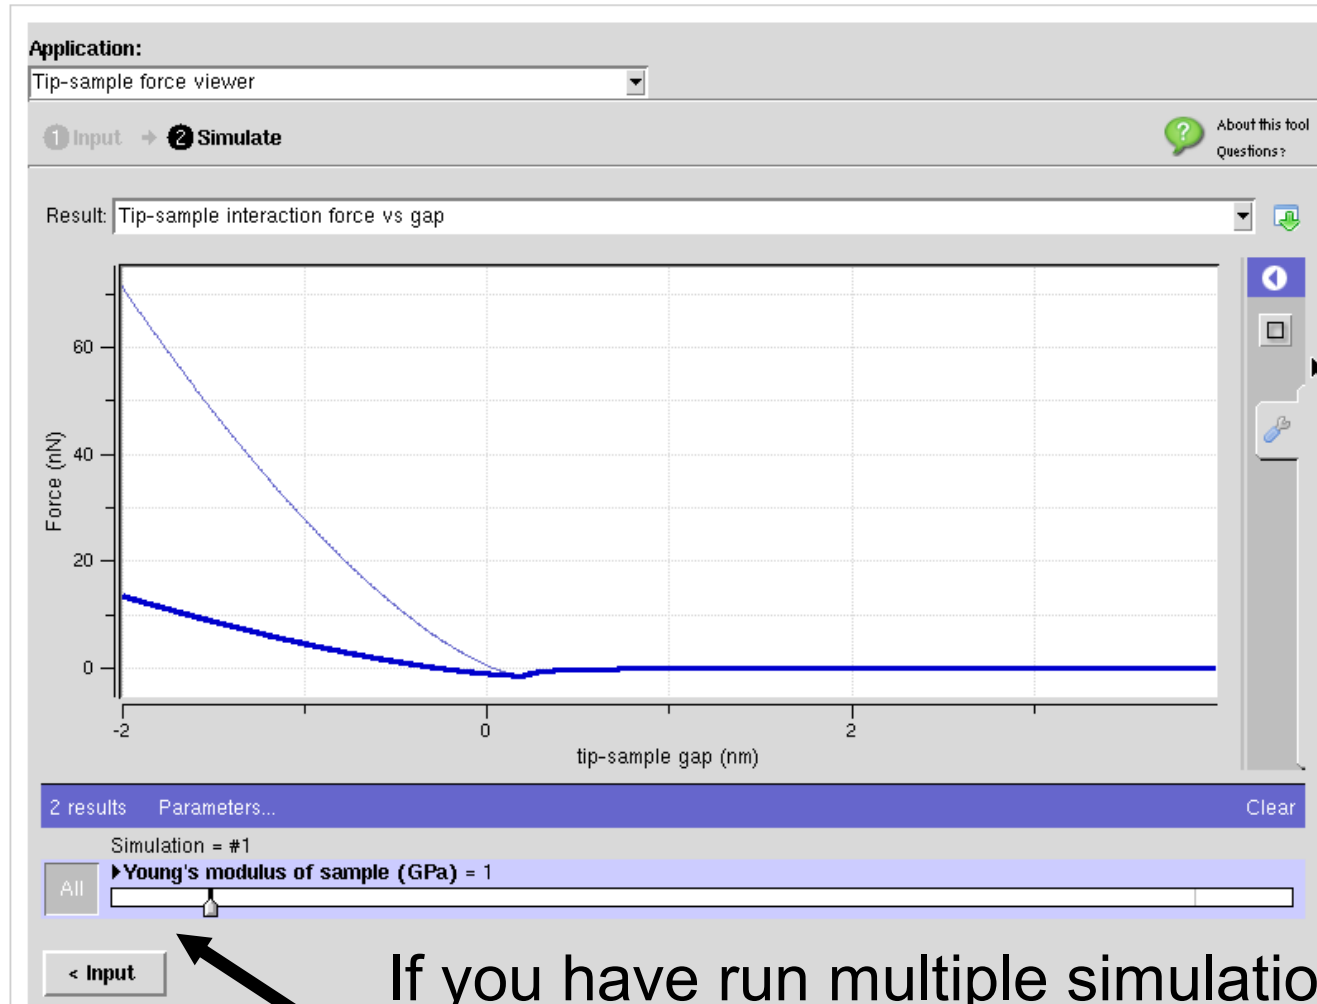

Click to save graph as image or spreadsheet file

# Output Window

# Output window

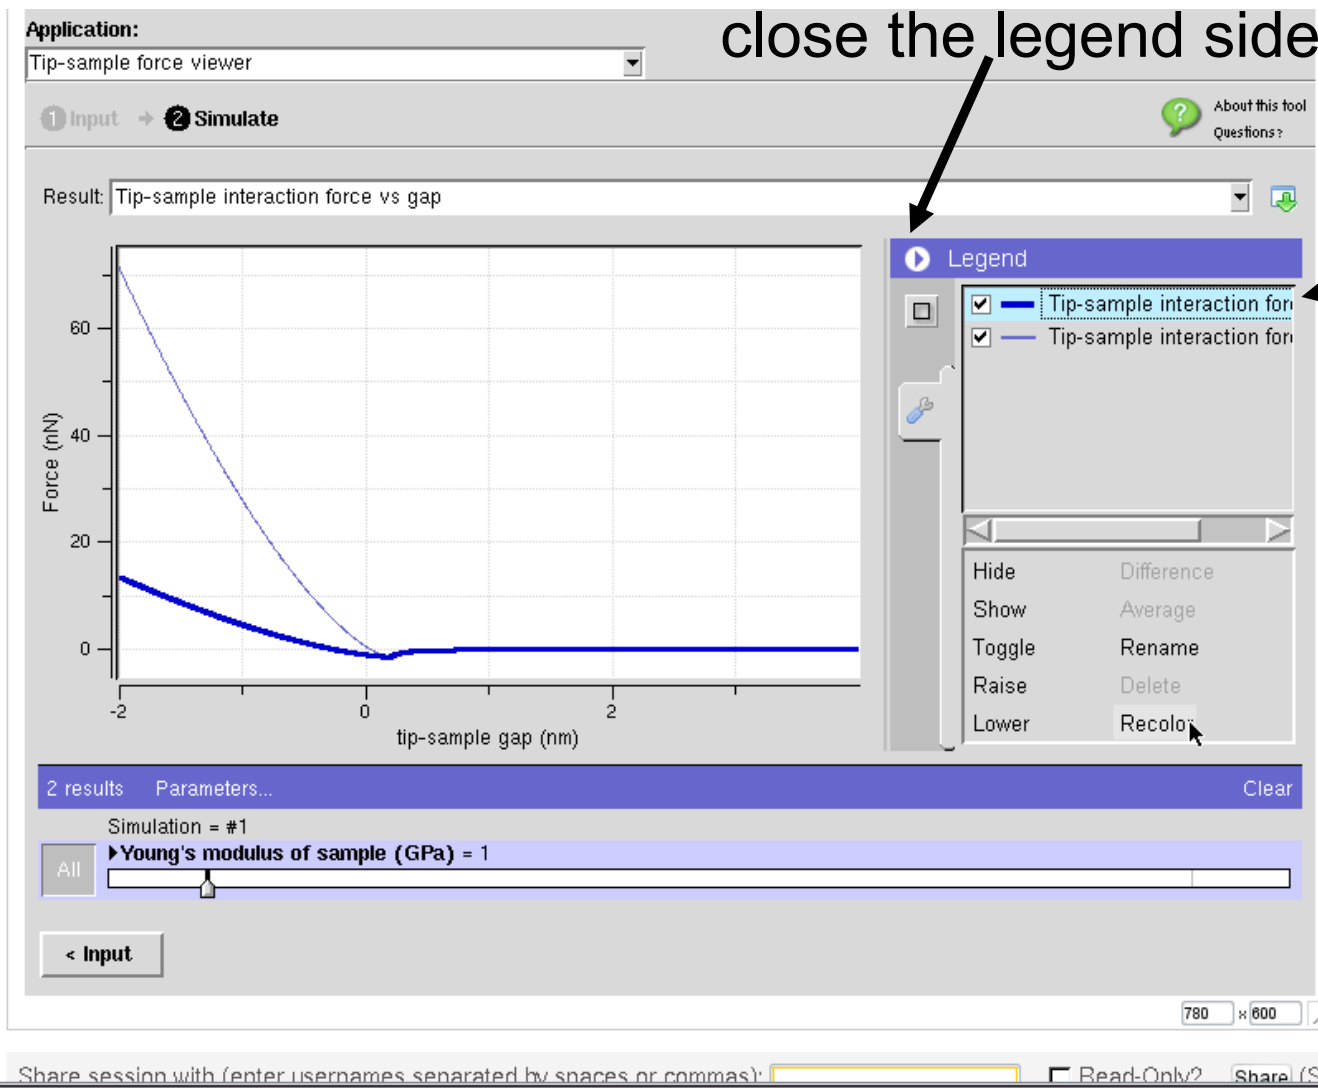

“clear” button  
erases all results

If you have run multiple simulations, you  
can choose between them with the slider  
bar, or overlay all with the “All” button

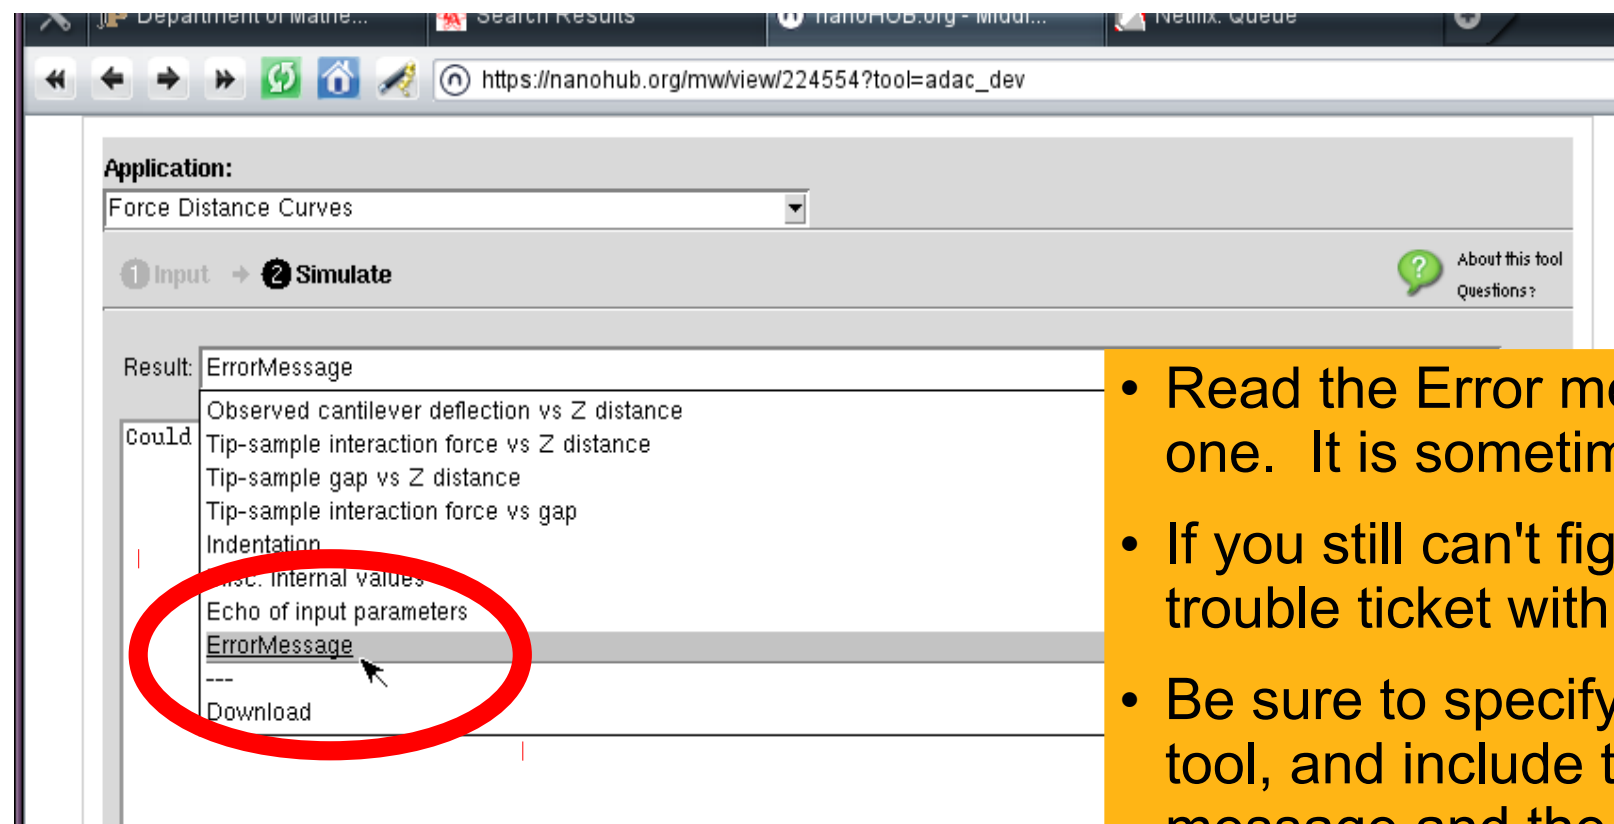

# Output window

Click the triangle to open  
close the legend sidebar

on the legend  
sidebar, you can  
change colors,  
hide/show different  
lines.

# What to do if you have problems

- Read the Error message if there is one. It is sometimes helpful
- If you still can't figure it out, log a trouble ticket with nanohub
- Be sure to specify VEDA as the tool, and include the error message and the "Echo of input parameters"
